

# System Engineer (100%)

Bio-Rad is an innovative company and thanks to its laboratory diagnostic systems world leader in the field of blood group serology.

## Your tasks

- You will take part in the process of defining product development requirements and you will provide support to the project managers during the design phase.
- You will ensure that the interactions between the various sub-systems (biological products, instruments, data manager) are clearly defined.
- You will establish a requirement management process and ensure a formal link between the marketing and development teams.
- You will define and organize the documentation structure in line with IVD regulatory requirements.
- You will establish a matrix linking needs, specifications and Integration, Verification and Validation testing.
- You will organize and lead the design reviews.
- You will contribute to establish integration, verification and validation plans.
- You will participate to the DHF (Design History File) definition and its achievement.
- You will contribute to innovation and technology survey.

## Your profile

- You hold a degree in biology/biomedical or an equivalent qualification.
- You have already a first professional experience in systems architecture and you are familiar with the product development process.
- You have some knowledge in diagnostic instrumentation.
- Project management skills are an asset.
- You like to work in an international environment and are prepared to travel within Europe occasionally.
- You are fluent in English and have good French knowledge.

Our company is involved in the supply of high-quality products and services intended for diagnostic laboratories. Independence, innovation and commitment are the fundamental values that permeate our company culture, as well as a strong orientation towards our customers and a multicultural environment.

If you feel attracted to this unique opportunity and you would like to take on new challenges, we would like to get to know you. Please forward your complete application dossier (application letter, CV, copies of work certificates and diplomas/degrees, etc.) to the address given in the advertisement.
